nishanKhadka

Along with my studies, on one hand, I tried starting up my own Tech company with my friends but failed to do enough business and eventually, we were forced to shut it down in the month of June 2018. We failed because of our professionalism. Hence, I moved to Australia in June 2019 and started my master's degree in information technology. Here I learned lots of Professional behavior, company culture and the role of teamwork in the project management. I was doing my full-time study so you can see the 2 years of gap in my work experience i.e., from 2019 to 2021. Now, I am a junior software developer at Urban Software Institute, Sippy Downs, Sunshine Coast. I am always keen to learn new things and currently I am more in UX UI design

Experience
